Yes

If yes, give a brief description and a list of modules currently operational (maximum 500 words)

The Management Information System aids in information generation, communication, problem identification and assists in the process of decision - making. The database is designed to manage Accounting and Finance, Examinations, Office Automation, Library digitalization, Online Test, Feedbacks and other operations of all levels of management of the institution. The Principal, Dean, Faculty of Arts Commerce and Sciences, Director - SPCTE, IQAC Coordinator, HOD's, Governing Body, Academic Council and College Council contribute the resource and effective Management System of the College. In administration, from students'

admission to individual Personal Details related to collegiate studies are maintained in the College Office. All the computers are internally connected in Network. This personal BioData is managed in the COE office for students' attendance. In the Library, the autolib., part of office Automation, is available. The office automation systems, accounting and finance systems and management reporting systems effectively deliver the information needed to decision makers the necessary components to collect, process, store and retrieve the information whenever it is needed. The Information System, a combination of software, hardware, personnel and infrastructure, helps in the collection of data. The hardware includes computers, scanners, printers and network devices. The software elements include the enterprise software and any other software that is used in the running of the administrative network. This component enables the collection of information. The Database Management System is made up of computer programs that help in the storage and retrieval of data. The Intelligence System is concerned with processing of the data collected and presenting it in a manner that is easy to comprehend. Research System is concerned with identifying the main management problems and coming up with alternative decisions that could have sufficed in a particular situation. This helps ensure that all the possible options are analyzed and the best decision made.

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

The objectives and intended outcome of the best practice is to translate the goals enshrined in the trust document of the college into reality. The stated goal of the Founding Fathers is to serve the rural and downtrodden people of this area in the fields of higher education and Technology. The underlying principle is to offer quality higher education - in a cost affordable to them - to those in the depressed classes to prepare them as responsible citizens bestowed with skills and competencies to serve Self, Society and State. At the time when the starting of a college was conceived by the great family of Vandayars, in the year 1956, India was still a formative new nation. The spread of higher education was abysmally low and the density of it was felt only in a few urban areas where people in higher rung of society were conglomerated. Secondly, the establishment of the college was carried out in a time when education - that too higher education and technical education - was mainly at

the hands of the state. The state being the primary player, there was a lot of control and people interested in the cause of education were hesitant to enter into the field of education in general and higher education in particular.

Thirdly at the time when the college was opened, education was primarily a selfless service sector at the hands of the state and dedicated philanthropists giving no room for business motives. The people venturing into the field of higher education have to alienate huge resources for a noble cause without any inkling of profit motive. Only rarest of the rare people came forward to offer this benevolence and the leading light of Poondi family ranks first among them to donate more than 750 acres of fertile land for the cause of education. These are the contextual features and challenging issues that needed to be addressed in designing this practice of offering higher education to uplift the downtrodden. More than 55 years have elapsed since the inception of the college and the college is under the ripe administration of an adorable octogenarian Gandhian. Even now the college is firmly sailing towards achieving the stated goal of equipping the people of this educationally backward area in the fields of higher education and technology without an iota of profit motive. This is all the more remarkable at this present juncture when floodgates of education are wide open to allow educational entrepreneurs, corporate houses and business people to vitiate the educational atmosphere to make quick money. To ensure the benefits of education, the system of reservation for SC, ST and BC people is in vogue. The college has extended the promulgation of reservation rules even to the admission of self-financed section. The college takes care to secure Financial Assistance through scholarships to all eligible candidates. Even those poor students, who are ineligible for scholarships are taken care of by the assistance offered by the Managements and other Private Charities.
