HERBAL GARDEN

## *1. Acacia nilotica (L.) Willd*

கருவேல மரம்

### Systematic position

Class : Dicotyledones

Order : Rosales

Family : Leguminosae

Genus : *Acacia*

Uses : Urino- gential diseases.

## *2. Acalypha wilkesiana Hort.*

குப்பை மேனி வகை

### Systematic position

Class : Dicotyledones

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Acalypha*

Uses : Fungal skin diseases.

### **3. *Achyranthes aspera* L.**

நாய்குருவி

#### **Systematic position**

Class : Dicotyledones

Order : Caryophyllales

Family : Amaranthaceae

Genus : *Achyranthes*

**Uses** : Diuretic, leucorrhoea, anaemia, jaundice, poisoning & renal dropsies.

ஆடாதொடா

### **4. *Adhatoda vasica* Nees.**

#### **Systematic position**

Class : Dicotyledones

Order : Caryophyllales

Family : Amaranthaceae

Genus : *Adhatoda*

**Uses** : Skin affections, bronchial troubles, diarrhoea, dysentery & glandular tumours.

## 5. *Aloe vera* (L.) Burm.f.

### Systematic position

Class : Monocotyledons

Order : Asparagales

Family : Xanthorrhoeaceae

Genus : *Aloe*

Uses : Leprosy, piles, mental disorders, stomach disorders, eye disorders & worm infections.

சோற்றுக் கற்றாழை

## 6. *Alpinia galanga* L. (Willd.).

### Systematic position

Class : Monocotyledons

Order : Zingiberales

Family : Zingiberaceae

Genus : *Alpinia*

Uses : Fever, ulcers, poisoning & pain.

சித்தரத்தை

பொன்னாங்கண்ணி

## 7. *Alternanthera sessilis* (L.) R. Br.

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Amaranthaceae

Genus : *Alternanthera*

Uses : Whole plant used in night blindness.

பேய்மிரட்டு

## 8. *Anisomeles malabarica* (L.) R. Br.

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Anisomeles*

Uses : Its essential oil is used in rheumatism.

## **9. *Artobotrys odoratissimus* (Lam.) Merr.**

மனோரஞ்சிதம்

### **Systematic position**

Class : Dicotyledons

Order : Magnoliales

Family : Annonaceae

Genus : *Artobotrys*

**Uses** : Leaves contain an antifertility principle.

## **10. *Baliospermum montanum* (Willd.)**

### **Systematic position**

Class : Dicotyledons

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Baliospermum*

**Uses** : Snake-bite poisoning, blood disorders, skin diseases, liver disorders & piles.

பேயாமணக்கு

## 11 . *Basella rubra* L.

கொடி பசளி

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Basellaceae

Genus : *Basella*

Uses : Constipation, drug addiction, abscess & retention of urine

காஞ்சினி

## 12. *Bauhinia tomentosa* L.

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Bauhinia*

Uses : Digestive disorders, cough, leucorrhoea & diarrhoea.

## 13. *Bauhinia variegata* L.

மந்தாரை

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Bauhinia*

Uses : Ulcers, obesity, constipation & haemorrhage.

## 14. *Bougainvillea spectabilis* Willd.

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Nyctaginaceae

Genus : *Bougainvillea*

Uses : Ulcers, diabetic, skin diseases & human sterility.

காகித பூ

## 15. *Caesalpinia sappan L.*

பதிமுகம்

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Caesalpinia*

**Uses** : Bronchitis, wounds, erysipelas & goiter.

புஞ்சனை

## 16. *Calophyllum inophyllum L.*

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Calophyllaceae

Genus : *Calophyllum*

**Uses** : Astringent, internal haemorrhage, rheumatism & skin diseases.

## 17. *Calotropis procera* (Aiton) W.T. Aiton

எஞ்சகு

### Systematic position

Class : Dicotyledons

Order : Gentianales

Family : Asclepiadaceae

Genus : *Calotropis*

Uses : Root bark used in leprosy.

## 18. *Canna indica* L.

### Systematic position

Class : Monocotyledons

Order : Zingiberales

Family : Cannaceae

Genus : *Canna*

கல்வாழை

Uses : Fever, anaemia, ulcers & earache.

## 19. *Capsicum frutencens* L.

മിണകായ്

### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Capsicum*

Uses : Carminative and rubefacient.

മുടക്കത്താൻ

## 20. *Cardiospermum halicacabum* L.

### Systematic position

Class : Dicotyledons

Order : Sapindales

Family : Sapindaceae

Genus : *Cardiospermum*

Uses : Diuretic, diaphoretic, emetic, emmenagogue, laxative & nervous diseases.

## 21. *Cassia alata* L.

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Cassia*

Uses : Skin troubles, purgative.

வண்டுகொல்லி

## 22. *Catharanthus roseus* (L.) G. Don.

### Systematic position

Class : Dicotyledons

Order : Gentianales

Family : Apocynaceae

Genus : *Catharanthus*

Uses : Diabetes, relief in pain of wasp stings.

நித்தியக்கல்யாணி

## 23. *Centella asiatica* (L.) Urban

வல்லாரை

### Systematic position

Class : Dicotyledons

Order : Apiales

Family : Apiaceae

Genus : *Centella*

**Uses** : Digestive disorder, urinary diseases, mental retardation, fainting, fever & vomiting.

நார்த்தாம் பழம்

## 24. *Citrus medica* L.

### Systematic position

Class : Dicotyledons

Order : Sapindales

Family : Rutaceae

Genus : *Citrus*

**Uses** : Preserved rind used in dysentery & piles.

## 25. *Cleome viscosa* L

நாய் கடுகு

### Systematic position

Class : Dicotyledons

Order : Brassicales

Family : Cleomaceae

Genus : *Cleome*

Uses : Fever, diseases of kapha & poisoning.

பீக்கலாத்தி

## 26. *Clerodendron inerme* L

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Clerodendron*

Uses : Glandular swellings, eczema, leucorrhoea, scabies, pain & snake-bite poisoning.

## 27. *Clerodendron phlomidis* L

தழுதாமை

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Clerodendron*

Uses : Measles, syphilis & bitter tonic.

## 28. *Clitoria ternatea* L

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Clitoria*

Uses : Roots cathartic and diuretic.

சங்கு பூ

## 29. *Codiaeum variegatum* (L.) A. Juss

കുറോട്ടൻ വകെ

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Codiaeum*

**Uses** : Pounded leaves applied to the abdomen of children suffering from urinary trouble.

## 30. *Coleus blumei* Benth

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Coleus*

**Uses** : Inflammation & anti- microbial agent.

കുറോട്ടൻ വകെ

## 31. *Colocasia* sp.

### Systematic position

Class : Monocotyledons

Order : Alismatales

Family : Araceae

Genus : *Colocasia*

Uses : Astringent and styptic.

ചേമ്പാളില

## 32. *Costus igneus* N.E.Br

### Systematic position

Class : Dicotyledons

Order : Zingiberales

Family : Zingeraceae

Genus : *Costus*

Uses : Diabetic, leprosy, cough, polyuria, haemorrhage & fever.

இன்சுலின்

### 33. *Crescentia cujete* L

#### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Crescentia*

**Uses** : Bark decoction used as a vulnerary.

திருஒடு மரம்

### 34. *Datura discolor* Bernh

#### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Datura*

**Uses** : Leaves smoked as cigarettes.

கருஊமத்தை

### **35. *Datura metel* L.**

ஊமத்தை

#### **Systematic position**

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Datura*

**Uses** : Leaves narcotic and antispasmodic.

திருக்கள்ளி

### **36. *Euphorbia tirucalli* L.**

#### **Systematic position**

Class : Dicotyledons

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Euphorbia*

**Uses** : Latex- skin diseases, diseases of vatam and kapham, leprosy, glandular swellings & intestinal worms.

### **37. *Eranthemum trinervia***

#### **Systematic position**

Class : Dicotyledons

Order : Lamiales

Family : Acanthaceae

Genus : *Eranthemum*

**Uses** : Roots boiled in milk & used in leucorrhoea.

பால்பெருக்கி

### **38. *Euphorbia cyathophora* Murray.**

#### **Systematic position**

Class : Dicotyledons

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Euphorbia*

**Uses** : Capsule used to remove warts, scorpion sting, worm infestation & ulcers.

## 39. *Euphorbia milii* Des Moul

கள்ளி வகை

### Systematic position

Class : Dicotyledons  
Order : Malpighiales  
Family : Euphorbiaceae  
Genus : *Euphorbia*

Uses : Warts and cancer.

அத்தி

## 40. *Ficus racemosa* L.

### Systematic position

Class : Dicotyledons  
Order : Rosales  
Family : Moraceae  
Genus : *Ficus*

Uses : Diarrhoea, diabetes, bilious affection, piles & uterine bleeding.

## 41. *Gossypium hirsutum* L

பருத்தி

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Gossypium*

Uses : Leucorrhoea, ulcers, swellings, fever, dysentery, piles, cut wounds, aphrodisiac.

ரூத்ராட்சம்

## 42. *Guazuma ulmifolia* Lam

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Guazuma*

Uses : Fruits used as a pectoral, Leaf extract reduces corpulence.

## 43. *Hibiscus rosa-sinensis* L

செம்பருத்தி

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Hibiscus*

Uses : Leucorrhoea, menorrhagia, polyuria, hair falling & contraceptive.

கோபுரம் தாங்கி

## 44. *Indoneesiella echiooides* (L.) Sreem.

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Acanthaceae

Genus : *Indoneesiella*

Uses : Juice used as a febrifuge.

## 45. *Ixora coccinea* L

இடலி பூ

### Systematic position

Class : Dicotyledons

Order : Gentianales

Family : Rubiaceae

Genus : *Ixora*

Uses : Venereal diseases, fever, thirst, leucorrhoea, dysentery & ulcers.

## 46. *Jatropha multifida* L

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Jatropha*

Uses : Indigestion, scabies, fevers, venereal diseases & criminal poisoning.

## 47. *Justicia gendarussa* Burm. f

வதைகுட்டி

### Systematic position

Class : Dicotyledons

Order : Gentianales

Family : Rubiaceae

Genus : *Justicia*

Uses : Boils, swellings & diarrhoea.

## 48. *Lantana camara* L

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Verbenaceae

Genus : *Lantana*

Uses : Tumours, rheumatism, malaria & haemorrhage.

## 49. *Limonia acidissima* L

விளை மரம்

### Systematic position

Class : Dicotyledons

Order : Sapindales

Family : Rutaceae

Genus : *Limonia*

**Uses** : Leaves aromatic, carmative, astringent & stomachic

## 50. *Melia azedarach* L

### Systematic position

Class : Dicotyledons

Order : Sapindales

Family : Meliaceae

Genus : *Melia*

**Uses** : Worm infestation, amenorrhoea, sterility of female, eczema & spleenomegaly.

மலை வேம்பு

## 51. *Millingtonia hortensis L.f*

மரமல்லி

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Millingtonia*

Uses : Tannin from bark used as antipyretic.

## 52. *Mimosa pudica L*

தொட்டால் சுருங்கி

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Mimosaceae

Genus : Mimosa

Uses : Urinary complaints, sinus, sores & piles.

## 53. *Nerium oleander* L

ചെവ്വരണി

### Systematic position

Class : Dicotyledons

Order : Gentianales

Family : Apocynaceae

Genus : *Nerium*

Uses : Leprosy, skin diseases, glandular swellings, poisoning & wounds.

പാരിജ്ഞാതമ്

## 54. *Nyctanthes arbor- tristis* L

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Oleaceae

Genus : *Nyctanthes*

Uses : Fever, worm infestation, diseases of vatam & scabies.

## 55. *Ocimum sanctum* L.

துளசி

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Ocimum*

Uses : Diuretic, carmative, gonorrhoea, dysentery, diarrhoea, earache, stomach disorder & nasal disorders.

திருநீற்றுப்பச்சிலை

## 56. *Ocimum basilicum* L

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Ocimum*

Uses : Fever, coryza, mental disorders, cough & ulcers.

## 57. *Pandanus tectorius* Parkinson

### Systematic position

Class : Dicotyledons

Order : Pandanales

Family : Pandanaceae

Genus : *Pandanus*

Uses : Headache, anorexia, indigestion, polyuria, eye diseases & leprosy.

தாழை

அரை நெல்லி

## 58. *Phyllanthus acidus* L. Skeels

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Phyllanthaceae

Genus : *Phyllanthus*

Uses : Roots and seeds cathartic, laxative, biliousness.

## 59. *Phyllanthus amarus* Schum & Thonn

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Phyllanthaceae

Genus : *Phyllanthus*

Uses : Jaundice, diabetes, eye disorders, skin diseases, vomiting, diseases of head.

## 60. *Phyllanthus emblica* L

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Phyllanthaceae

Genus : *Phyllanthus*

Uses : Fruit astringent, cooling, diuretic , laxative, a rich source of vitamin C.

கீழா நெல்லி

நெல்லிக்காய்

## **61. *Piper nigrum* L**

மிளகு

### **Systematic position**

Class : Dicotyledons

Order : Piperales

Family : Piperaceae

Genus : *Piper*

**Uses** : Stimulant, fever, stomachic, piles & cutaneous troubles.

உதிர வேங்கை

## **62. *Pterocarpus santalinus* L. f**

### **Systematic position**

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Pterocarpus*

**Uses** : Oedema, headache, skin diseases, vomiting, diarrhoea, eye diseases, thirst & leprosy.

## 63. *Pisonia grandis* R.Br

ಲಟ್‌ಕಾಟ್‌ಟುಕ ಹೀರೆ

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Nyctanginaceae

Genus : *Pisonia*

Uses : Fresh leaves used as an anti- inflammatory and as a diuretic.

ರೋಜ್‌ಹಾ

## 64. *Rosa damascena* Mill

### Systematic position

Class : Dicotyledons

Order : Rosales

Family : Rosaceae

Genus : *Rosa*

Uses : Pyrexia, thirst, leucorrhoea, carminative, laxative & stomach ache.

## **65. *Sauropus androgynus* (L.) Merr**

### **Systematic position**

Class : Dicotyledons

Order : Malpighiales

Family : Phyllanthaceae

Genus : *Sauropus*

**Uses** : Decoction of the roots given in stricture of the bladder and in fevers.

தவசி கீரை

மணத்தக்காளி

## **66. *Solanum nigrum* L**

### **Systematic position**

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Solanum*

**Uses** : Leprosy, piles, fever, oedema, polyuria, hiccup, cardiac diseases, vomiting & rejuvenator.

## 67. *Solanum trilobactum* L

### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Solanum*

Uses : Berries and flowers used to relieve cough.

தாதுவளை

## 68. *Solanum torvum* Sw

### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Solanum*

Uses : Cough, cracks in the feet, diuretic & digestive.

சண்டைக்காய்

## 69. *Tecoma stans* (L.) Juss ex. kunth

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Lamiaceae

Genus : *Tecoma*

Uses : Roots diuretic, vermifuge and tonic.

சொர்ண பட்டி

## 70. *Terminalia bellerica* (Gaertn.) Roxb

### Systematic position

Class : Dicotyledons

Order : Myrtales

Family : Combretaceae

Genus : *Terminalia*

Uses : Guinea worm diseases, leucorrhoea, venereal diseases, hypertension & pox.

தானி மரம்

## **71. *Thuja orientalis* L**

தூஜா

### **Systematic position**

Class : Pinopsida

Order : Pinales

Family : Cupressaceae

Genus : *Thuja*

**Uses** : Leaves used as a tonic, diuretic and antipyretic.

## **72. *Verbesina encelioides* (Cav.) Benth. & Hook. F.ex A. Gray.**

### **Systematic position**

Class : Dicotyledons

Order : Asterales

Family : Asteraceae

Genus : *Verbesina*

**Uses** : Inflammatory action & spider bite.

## 73. *Vetiveria zizanioides* (L.) Nash.

வெட்டி வேர்

### Systematic position

Class : Monocots

Order : Poales

Family : Poaceae

Genus : *Vetiveria*

**Uses** : Diseases of pittam, thirst, jaundice, fever, headache & burns.

தண்ணீர்விட்டான் கிழங்கு

## 74. *Asparagus aethiopicus* L

### Systematic position

Class : Monocots

Order : Asparagales

Family : Asparagaceae

Genus : *Asparagus*

**Uses** : Urinary diseases, gastritis, eye diseases, tonic & diseases of nervous disorders.

## 75. *Wedelia chinensis* (Osbeck.) Merr.

கொடி கரிசாலை

### Systematic position

Class : Dicotyledons

Order : Asterales

Family : Asteraceae

Genus : *Wedelia*

Uses : Cough, skin diseases, menorrhagia & jaundice.

## 76. *Coreopsis gladiata* Walter

### Systematic position

Class : Dicotyledons

Order : Asterales

Family : Asteraceae

Genus : Coreopsis

Uses : Ornamental.

## 77. *Abutilon indicum* (Link) Sweet

துத்தி

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Abutilon*

Uses : Piles, ulcers, haematemesis, cough, leprosy, jaundice & disorders of nervous.

கானா வாழை

## 78. *Commelina benghalensis* L

### Systematic position

Class : Monocotyledon

Order : Commelinales

Family : Commelinaceae

Genus : *Commelina*

Uses : Leprosy, haemorrhage, fever & laxative.

## 79. *Commelina diffusa* Burm. f

கானா வாழை

### Systematic position

Class : Monocotyledon

Order : Commelinales

Family : Commelinaceae

Genus : *Commelina*

**Uses** : A dye is also obtained from the juice of the petals for use in painting; febrifugal and diuretic effects.

## 80. *Eclipta prostrata* (L.) L

### Systematic position

Class : Dicotyledons

Order : Asterales

Family : Asteraceae

Genus : *Eclipta*

**Uses** : Jaundice, skin diseases, inflammation, anaemia, dental diseases, cough, ear & eye diseases.

கரிசலாங்கண்ணி

## 81. *Evolvuvus alsinoides* (L.) L

விழ்ணுகரந்தை

### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Convolvulaceae

Genus : *Evolvuvus*

Uses : Fever, cough, diseases of vatam, amenorrhoea, diarrhoea.

## 82. *Malva neglecta* Wallr.

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Malva*

Uses : Skin diseases, respiratory disorders & gastrointestinal tract.

## 83. *Oxalis stricta* L

விராலிக்கை

### Systematic position

Class : Dicotyledons

Order : Oxalidales

Family : Oxalidaceae

Genus : *Oxalis*

**Uses** : Fever, headache, abdominal disorders, venereal diseases & digestive disorders.

ஆமணக்கு

## 84. *Ricinus communis* L

### Systematic position

Class : Dicotyledons

Order : Malpighiales

Family : Euphorbiaceae

Genus : *Ricinus*

**Uses** : Vatam, constipation, piles, chest pain, cough, leprosy, fever & abdominal disorders.

## 85. *Ruellia tuberosa* L

காயபச்சிலை

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Acanthaceae

Genus : *Ruellia*

**Uses** : Anti-diabetic, antipyretic, analgesic, antihypertensive, gastro protective & gonorrhea.

கிரந்திநாயகம்

## 86. *Ruellia prostrata* Poir.

### Systematic position

Class : Dicotyledons

Order : Lamiales

Family : Acanthaceae

Genus : *Ruellia*

**Uses** : Natural dye for textiles.

## 87. *Sida cordata* (Burm.f.) Borss.

சீதாமுட்டி

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Sida*

**Uses** : Fevers, urinary complaints, leucorrhoea, cut & bruises.

பழம்பாசி

## 88. *Sida acuta* Burm.f.

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Sida*

**Uses** : Diseases of vatam, fever, ear diseases, skin eruptions & worm infestation.

## 89. *Sida cordifolia* L

குருந்தொட்டி வேர்

### Systematic position

Class : Dicotyledons

Order : Malvales

Family : Malvaceae

Genus : *Sida*

**Uses** : Piles, abscess, pain, nervous disorders, coryza & cardiac diseases.

மனத்தக்காளி

## 90. *Solanum nigrum* L

### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Solanum*

**Uses** : Leprosy, piles, fever, oedema, polyuria, cardiac diseases, vomiting, rejuvenator & cough.

## 91. *Solanum xanthocarpum* Schrad & Wendl.

கண்டங்கத்திரி

### Systematic position

Class : Dicotyledons

Order : Solanales

Family : Solanaceae

Genus : *Solanum*

Uses : Diuretic, carminative, cough, tuberculosis, fever & indigestion.

பூவங்குருந்தல்

## 92. *Vernonia cinerea* (L.) Less.

### Systematic position

Class : Dicotyledons

Order : Asterales

Family : Asteraceae

Genus : *Vernonia*

Uses : Leucorrhoea, skin diseases, stomatitis, thirst.

## **93. *Indigofera aspalathoides* Vahl**

சிவனார்வேம்பு

### **Systematic position**

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Indigofera*

**Uses** : Leprosy, cancer, skin diseases.

## **94. *Phyla nodiflora* (L.) Greene**

### **Systematic position**

Class : Dicotyledons

Order : Lamiales

Family : Verbenaceae

Genus : *Phyla*

**Uses** : Dysentery, dandruff, ulcer, piles.

பொடுதலை

## 95. *Mollugo pentaphylla* L

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Molluginaceae

Genus : *Mollugo*

Uses : Stomachic, aperients, skin diseases, earache.

குத்துத்திராய்

## 96. *Mollugo nudicaulis* Lam

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Molluginaceae

Genus : *Mollugo*

Uses : Pectoral, whooping cough, biles.

பர்பாடகம்

## 97. *Mollugo oppositifolia* L

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Molluginaceae

Genus : *Mollugo*

Uses : Skin diseases, cough, fever.

தூரா பூண்டு

## 98. *Thephrosia purpurea* (L) Pers

### Systematic position

Class : Dicotyledons

Order : Fabales

Family : Fabaceae

Genus : *Thephrosia*

Uses : Ulcers, leprosy, asthma, boils and pimples.

கொழுஞ்சி

## 99. *Heliotropium indicum* L

தேள்கொடுக்கு

### Systematic position

Class : Dicotyledons

Order : Polemoniales

Family : Boraginaceae

Genus : *Heliotropium*

Uses : Ulcer, eczema, digestive disorders.

## 100. *Boerhavia diffusa* L. nom. Cons.

### Systematic position

Class : Dicotyledons

Order : Caryophyllales

Family : Nyctaginaceae

Genus : *Boerhavia*

Uses : Arthritis, jaundice, cardiac diseases.

முக்கிரட்டை

*Thank You!*
